Empowering you wherever the mission may lead.

Research/Development, Test and Evaluation: SAVA’s subject matter experts help drive the realization of technology and technology ecosystems that enable new capabilities to be leveraged quickly.

Engineering: SAVA’s engineering services include a wide range of consulting, investigation, evaluation, planning, design and development practices structured to solve complex issues in the intelligence, command, control and information domains.

Logistics: SAVA’s holistic, top-down view of the entire logistics landscape integrates, security, acquisition strategies, planning and requirements analysis, policy development and total logistics system lifecycle support.

Facilities: SAVA’s expertise includes turnkey management of private secure and FEDRAMP cloud infrastructure and systems designed to host mission critical IT infrastructure and application development, testing and operations.

Consulting, Education and Training: SAVA develops and conducts comprehensive training programs for the federal government, including executive development, mentoring and coaching, policy and policy guidance training and multimedia platform training for expert systems.

Fiercely focused on the deliverable

SAVA is an organization single-mindedly driven to support our customers with solutions that deliver value earlier and more often across their entire lifecycles. A small company with large and mature capabilities, we have a rock solid history of successfully managing multiple task orders throughout the Federal space. Our management includes former DoD and civilian senior leadership who now integrate complex, cost-smart operations across the government. And we back down from no challenge. Fiercely focused on the deliverable, and with proven capability to execute anytime and anywhere, SAVA is your partner of choice to ensure superior mission outcomes.

An ISO 9001:2015 Registered Company | Appraised at CMMI Level 2
